

Advanced I/O Concepts

OBJECTIVES

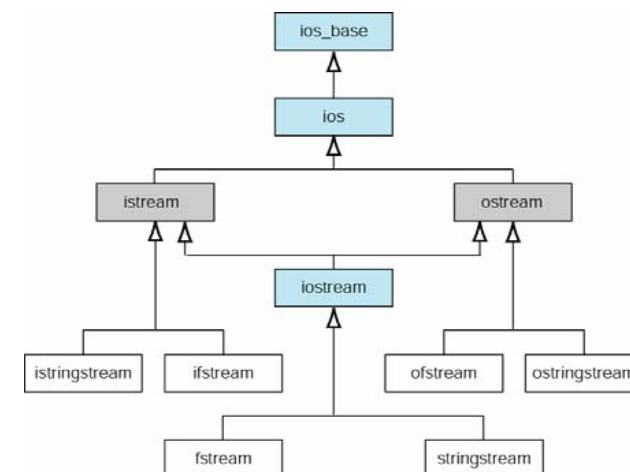

After studying this chapter you will be able to:

- ❑ Understand and explain the differences between text and binary files.
- ❑ Understand and explain the three file states (read, write, error).
- ❑ Read and write binary files.
- ❑ Use a seek function to set the file position to a specified location.
- ❑ Describe the basic file update concept.
- ❑ Write a program to update a sequential file.

16.1

Input/Output Classes
